- Leaves Zero Residue.
- 10 +years product shelf life, 1 year product warranty.
- EU Safety, health and environment requirement.

What Can't be Seen..... Can't be Stolen.
What Can't be Seen..... Can't be Targeted.

An alarm system can just inform you about a theft but not prevent it. Burglars need less than 3 minutes to make a crime, usually they know exactly where to go and what to take, while the police need at least 30-45 minutes to arrive. **Only with fogging security systems you get 100% protection from the first seconds of crime.** Equipped with Alarm System (can also be added to existing one); a Fogging Security System can stop a burglary attempt (when bank is closed) in the following ways:

1. Automatically detects any intruder 180° up to 12 Meters.
2. Automatically Raise an Alarm.
3. Automatically sends alert SMS and Calls to pre-set Mobiles.
4. Automatically Generates a thick, impenetrable and harmless smoke that make intruders see nothing by making the visibility to Zero within 3 seconds.
5. "What can't be seen, can't be stolen" makes the intruders flee with empty hand.
6. Ends the Crime before it starts.

In case of Robbery attempt (when bank is open), it is very dangerous to use the traditional PANIC button fitted with Alarm system. Robbers may fire selectively before fleeing with huge amount cash, making loss of many precious human lives. In this case, use of Fogging Security System may be useful to save lives and cash counter.

1. As soon as PANIC button is pressed, the area visibility inside the premises will be zero within 3 seconds with thick fog.
2. It make robbers unable to target any person or valuables, compelling them to flee empty handed.
3. Panic button can be triggered through wrist watch which is easier than traditional switch/remote button.

- Our equipment is really professional and has the list of distinctive features that you can find below:
- The machines provide the fastest and the densest fog; the speed of emission and density of fog cannot be compared with any other manufacturer.
- Patented nozzle ant tamper and orientable nozzle.
- Very low and always stable power consumption (starting from 37W).
- Wide range of products for different volume spaces and different customer needs.
- All European and international certificates.
- We are the most price aggressive in the market, not only because of the price of equipment, but also for tank is cheap and it does not need any maintenance at all.
- It can be also be activated manually by wrist watch/panic button/mobile/remote giving wider scope to successfully stop burglary and robbery attempt.
- Can be connected to any existent alarm system, CCTV, panic button, bracelet, sensors and so on.

Effective, Efficient, Reliable, and European and International Certification.
